

Beware of Things That Go Bump in the Night

When the sun goes down and the night comes on there are some additional things we should consider for a flight. We will discuss some tips and techniques for determining the associated risks of night flying. We will review some of the rules for night flight, and we will cover some case studies from actual night flight mishaps. Attendance at this seminar will meet one of the requirements for the FAA WINGS program.

Directions: Take the elevator located next to the Southwest Airlines ticket counter to the 2nd floor. Right turn off the elevator to the Ambassador Room

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
